WARPING CREEL

Individually Controlled Tensioner type **Model-PT**

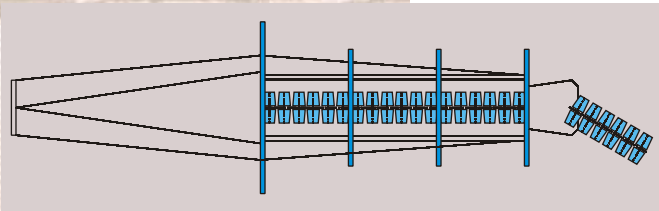

**PRASHANT
GAMATEX**

REVOLVING TYPE (PT - R)

- Draw-off inward type system.
- Cone holders are mounted on both sides of each revolving modular frame.
- New set of cone feeding is very easy and convenient from outside.
- Recreeling is possible during warping operation, so improves over all machine usage time.
- Very quick positioning of new cones.
- Central corridor facility. It is easy to access yarn breaks on both sides and quicker to attend.
- Dose not require any extra space on floor for next set of yam package.

TROLLEY TYPE (PT - T)

- Draw-off outward type system
- Sturdy robust structure
- Trolleys are equipped with ball bearing mounted wheels for easy manoeuvrability
- Easy exchange of trolleys
- Short lot change period while using extra set of trolleys

STOP MOTION

- Optical sensing stop motion
- Fast response time
- No electrical contact and hence reduced maintenance
- Realy blocking electronic circuit prevents false glowing of bulb
- Separate indication in each vertical row for quick attempt
- Both the side of creel having separate locking facility

TENSIONER

- Three post tensioner unit with ceramic eyelet.
- Yarn passes through stainless still discs.
- Acrylic cover to protect the mechanism.
